3rd Annual Postdoctoral Scholar Oral Presentation Day

Monday, February 8, 2016, 10:30am-2pm
King Life Science Building, Room 2057
Sponsored by VWR
Hosted by the Department of Biological Science

All are welcome to attend!!!!!!
Grad Students especially encouraged to attend!

10:30 Opening remarks, Debra Fadool, Director of Postdoctoral Affairs

10:40 Juan Carlos Rivera-Mulia (Gilbert lab) Replication timing abnormalities in pediatric leukemia

11:00 Gengqiang Xie (Deng lab) Snr1, distinct from other components of the SWI/SNF complex, acts as a tumor suppressor in Drosophila imaginal tissues

11:20 Jianjun Wu (Zhu lab) Inhibition of cGAS DNA sensing by Herpesvirus virion protein

11:40 Lunch (provided)

12:20 Lida Ghazanfari (Lenhert lab) Synthesis of nanohybrid system for treatment of breast tumor in controlled laser hyperthermia

12:40 Matthew Johnson (Stroupe lab) One dataset, many maps: 3D electron cryo-microscopy of a structurally heterogenous ribosome assembly intermediate

1:00 Carl Whittington (Rokyta lab) Limited proteolysis in protein biochemistry and experimental viral evolution

1:20 David McNutt (Underwood lab) Variation in plant-mediated intra- and interspecific interactions among insect herbivores: Effects of host plant genotype

1:50 Presentation of award from VWR, Gustavo Galdo
