What are the expectations for postdoctoral training?

1. To have a close apprenticeship by an expert in your field to acquire the professional and technical skills needed to pursue a career path in academia, industry, government, or other high demand organization.
2. To achieve independence as an investigator, researcher, and/or instructor.
3. To become a colleague by the conclusion of your training interval rather than a mentee.
What is the typical time progression?

Dependent upon field and technical skill acquisition
Determined by your level of ability for oral and written communication
Within 3 months = General project determination
By second year = Independently lead work and strong knowledge base in new field
End of second year = begin seeking funding for your research
Continual progress towards your targeted goals and take on more responsibilities

*Element of luck, yet discovery favors the prepared mind*

What are some best practices?

• Two-way communication with your advisor to understand in writing their expectations and your professional and research goals
• Periodic and consistent evaluation of your progress and measurement of your productivity
• You are responsible for continuously seeking opportunity to advance your career
• Not too many projects simultaneously, but not too few
• Understanding of what research trajectory you may continue to pursue and launch following your training at FSU
