What are the expectations for postdoctoral training?

1. To have a close apprenticeship by an expert in your field to acquire the professional and technical skills needed to pursue a career path in academia, industry, government, or other high demand organization.

2. To achieve independence as an investigator, researcher, and/or instructor.

3. To become a colleague by the conclusion of your training interval rather than a mentee.
What is the typical time progression?

Dependent upon field and technical skill acquisition
Determined by your level of ability for oral and written communication
Within 3 months = General project determination
By second year = Independently lead work and strong knowledge base in new field
End of second year = begin seeking funding for your research
Continual progress towards your targeted goals and take on more responsibilities

Element of luck, yet discovery favors the prepared mind
What are some best practices?

• Two-way communication with your advisor to understand in writing their expectations and your professional and research goals
• Periodic and consistent evaluation of your progress and measurement of your productivity
• You are responsible for continuously seeking opportunity to advance your career
• Not too many projects simultaneously, but not too few
• Understanding of what research trajectory you may continue to pursue and launch following your training at FSU
What is the OPDA and what is its purpose?

Central office to establish policies, coordinate opportunities, and guide postdoctoral training across campus.

Director interfaces with the Postdoctoral Advisory Board and the Postdoctoral Association.
