Research Coordinator Position  
Gratton Laboratory, Florida State University  
grattonlab.org

Job Description
The Gratton laboratory in the Psychology Department at Florida State University in Tallahassee, FL (https://psy.fsu.edu/) is looking for a full-time research coordinator to join in on exciting functional neuroimaging research on individual differences in brain networks. The research coordinator will perform both data collection and analysis tasks for the laboratory. Specific duties associated with this position include the coordination, management, collection, and analysis of behavioral and fMRI data for research studies, as well as administrative duties (e.g., IRB) associated with the project. This position is an excellent opportunity for individuals looking for additional psychology/biomedical research experience before applying for graduate school.

Position can begin as early as September 1, 2022 (start date flexible). Commitment must be for two years, but position may be extended.

FSU is an Equal Opportunity/Access/Affirmative Action/Pro Disabled & Veteran Employer.

Minimum qualifications:
- An undergraduate degree in psychology, neuroscience, or a related social, health, or engineering field
- Strong attention to detail and organization
- Strong interpersonal skills
- Prior research experience

Preferred qualifications:
- Experience with MRI and/or behavioral human subjects data collection
- Some computational experience (e.g., UNIX, MATLAB, or Python) and an eagerness to gain more

Application Deadline: February 28, 2022 or when filled

Interested applicants can submit send a cover letter and resume to: cgratton@fsu.edu or submit materials through posting #50941 on https://jobs.fsu.edu
