Program in Neuroscience
The Florida State University

The NIH F31/F32 NRSA

Rick Hyson, Ph.D.
Professor of Psychology & Neuroscience
Program in Neuroscience
How do I know if it is right for me?

• Read the “Program Announcement”
  – F31 Individual Pretdoctoral Fellowship
  – F32 Individual Postdoctoral Fellowship

• Contact the Program Officer
Eligibility?

• “By the time of award, the individual must be a citizen or a non-citizen national of the United States or have been lawfully admitted for permanent residence.”
What type of science/training?

• Concept of the grant “mechanism”

• **F31**: “The purpose ... is to enable promising predoctoral students to obtain individualized, mentored research training from outstanding faculty sponsors while conducting dissertation research in scientific health-related fields relevant to the missions of the participating NIH Institutes and Centers. The proposed mentored research training must reflect the applicant's dissertation research project and is expected to clearly enhance the individual's potential to develop into a productive, independent research scientist.”

• **F32**: “The purpose ... is to support research training of highly promising postdoctoral candidates who have the potential to become productive, independent investigators in scientific health-related research fields relevant to the missions of the participating NIH Institutes and Centers. Applications are expected to incorporate exceptional mentorship.”
When can I apply?

- Standard dates for NIH
- F awards: April 8, Aug 8, Dec 8
What does it provide?

• Stipend; some “training related expenses”
  – Not really to fund the science itself (animals, chemicals etc.). Sponsor must have adequate support.

• Max 3 years
NRSA Parts of the application

https://grants.nih.gov/grants/ElectronicReceipt/files/Annotated_Forms_General FORMS-F.pdf (particularly RESEARCH & RELATED Other Project Information and the Fellowship Supplement Form)

• Various standard info in forms
• Biosketch (in specified format)
• Background and Goals (6 page limit)
• The Science
• Lots of info about doing that science
• Sponsor Section
• Recommendations (3)
The science and related info:

• Parts for Research Plan
  – Aims (1 page)
  – Strategy (6 pages)
Also:
  Project Summary
  Project Narrative
  Human/Animal Subjects
  Facilities and Resources
  Select Agents, Resource Sharing Plan
  Respective Contributions
  Selection of Sponsor and Institution
  Responsible Conduct in Research

Bottom Line: Plan on taking LOTS of time
Sponsor(s) and Co-Sponsor(s)

• A lot of info is required here; give them plenty of time
  – Biosketch (make it about training)
  – Sponsor/co-sponsor Statement (6 page limit):
    • Research support available
    • Training history
    • Training plan, environment, facilities
      – Make sure it is not “generic”; prove individual attention and good sponsor-student relationship
      – Make sure it lines up with your stated goals
    • Number of current trainees
    • Qualifications and Potential of Trainee
Recommendation Letters

• Who to ask:
  – People you **know** will write strong letters
  – People who you say will collaborate
  – People for whom it would be weird if you didn’t ask them for a letter (e.g., for postdoc, should probably have Ph.D. advisor)
  – Your sponsor(s) cannot be a letter writer
Review Criteria

F31/32
• Overall Impact
• Applicant
• Sponsor
• Research Training Plan
  – Significance
  – Approach
• Training Potential
• Environment

RO1
• Overall Impact
• Significance
• Investigator
• Innovation
• Approach
• Environment

Feasibility and Promise
How do I know which Institute/study section to send it to?

- Contact the Program Officer
